

Serious Mental Illness (SMI) in Nursing Facilities: Using a 5-Step Approach December 7, 2023

Today's Event Host

Nikki Harris, MA, CBHC-BS

COE-NF TRAINING AND EDUCATION LEAD

- For the past 20 years, Nikki has provided program implementation, development, management, external and internal trainings, policy development, quality assurance, and managed training coordination and technical support throughout the southeast region.
- Previously, she served as the program manager for the Division of Behavioral Health and Substance Use Services within the South Carolina Department of Corrections.
- She has a B.A. in psychology from the University of South Carolina, a M.A. in counseling from Webster University and is a certified behavioral specialist.

Today's Presenter

Deborah E. Richman, BS, C.D.S.

DIRECTOR OF EDUCATION AND CLIENT DEVELOPMENT

Deborah is the director of education and client development for HealthCare Interactive, Inc. Her 30+ year professional career has focused on senior services primarily in the areas of program development and education/training for staff, family and community. She has presented at the international, national, state and local level for a variety of health-related organizations.

She provides consultation and training for residential care settings and community groups in the areas of aging, understanding dementia (symptoms and management), dementia related behavior, serious mental illness/dementia, therapeutic program development and person-centered care/interventions for direct care staff.

She received her bachelor of science degree from the University of Wisconsin-Oshkosh.

Disclaimer

HealthCare Interactive's national panel included SMI experts from the University of South Florida's Center for Aging Studies, the Houston Department of Veteran's Affairs, the University of Minnesota's School of Nursing, Florida Atlantic University's School of Nursing and College of St Scholastica in Minnesota. This panel helped to identify the four areas of SMI used in this training. Note that these may differ from other resources you are familiar with.

Overview

- Participants will define serious mental illness and list the four major categories of SMI.
- Participants will describe the differences between SMI and dementia and note misperceptions about SMI.
- Participants will describe the recovery model and list the five steps in the CARES® Approach for SMI.

What is Mental Illness?

https://www.nimh.nih.gov/health/statistics/mental-illness

Mental illnesses are common in the United States. It is estimated that more than one in five U.S. adults live with a mental illness (57.8 million in 2021). Mental illnesses include many different conditions that vary in degree of severity, ranging from mild to moderate to severe.

Two broad categories can be used to describe these conditions: Any Mental Illness (AMI) and Serious Mental Illness (SMI). AMI encompasses all recognized mental illnesses. SMI is a smaller and more severe subset of AMI. Additional information on mental illnesses can be found on the NIMH Health Topics Pages.

What is Serious Mental Illness (SMI)?

https://www.nimh.nih.gov/health/statistics/mental-illness

Serious mental illness (SMI) is defined as a mental, behavioral, or emotional disorder resulting in serious functional impairment, which substantially interferes with or limits one or more major life activities. The burden of mental illnesses is particularly concentrated among those who experience disability due to SMI.

SMI CATEGORIES

- Schizophrenia
- Bipolar Disorder
- Schizoaffective Disorder
- Major Depression

SMI and **DEMENTIA**

• Serious mental illness (SMI) is defined as a mental, behavioral, or emotional disorder resulting in serious functional impairment, which substantially interferes with or limits one or more major life activities. The burden of mental illnesses is particularly concentrated among those who experience disability due to SMI.

https://www.nimh.nih.gov/health/statistics/mental-illness

- **Dementia** is a term used to describe a group of symptoms affecting memory, thinking and social abilities. In people who have dementia, the symptoms interfere with their daily lives. Dementia isn't one specific disease. Several diseases can cause dementia.
- Dementia generally involves memory loss. It's often one of the early symptoms of the condition. But having memory loss alone doesn't mean you have dementia. Memory loss can have different causes.
- Alzheimer's disease is the most common cause of dementia in older adults, but there are other
 causes of dementia. Depending on the cause, some dementia symptoms might be reversible.

RECOVERY MODEL

- Recovery is not a cure
- Managing mental illness (recovery) is an ongoing journey
- Journey is different for each person

Recovery includes:

- a) Hope
- b) Healing
- C) Empowerment
- d) Connection
- e) A meaningful role in life
- f) Acceptance by others

The CARES® Approach

- C Connect
- A Assess Behavior
- R Respond appropriately
- E Evaluate what works
- S Share with others

CARES SMI PROGRAM

- Person-centered care and the CARES 5-step approach are the focus of all CARES Training Programs
- Shows the learner real situations with real people living with and working with Serious Mental Illness (SMI)
- The first step in implementation is to identify 2 "champions" at your facility to complete the training to then assist and encourage other staff to compete the training
- Consider monthly case studies of residents at your facility and discuss how the CARES 5-step approach can enhance the care provided to those with SMI
- CARES SMI Certification

Nursing Facility's CARES SMI MONTHLY OPEN OFFICE MEETINGS

The Monthly Open Office 30-minute meeting is created to assist Nursing Facilities introduce, implement and complete the self-paced learning program.

Meeting are scheduled on the 4th Wednesday of each month. Registration is required.

The meeting link below can be used to access each monthly meeting.

First meeting:

Wednesday, January 24, 2024 2:30 – 3:00 p.m. EST

Zoom registration:
