

OPIOID OVERDOSE RESPONSE

CHECK FOR A RESPONSE

1. GIVE NALOXONE, CALL 911

Insert the nozzle into one nostril and press the plunger firmly to give the entire dose of naloxone.

Call 911

2. NALOXONE

If a resident doesn't start breathing in 2-3 minutes, or responds to the first dose and then stops breathing again, give a second dose of naloxone.

3. RECOVERY POSITION

If the resident is breathing but unresponsive, put them on their side to prevent choking.
